

ORR Vending Program

ORR Safety offers a very simple and easy-to-implement vending program for PPE. Vending will ensure that your employees have 24/7/365 access to all of the correct, critical and preapproved safety products to do their job while reducing overall costs.

Companies that have implemented vending programs have seen an average of 35% reduction in usage due to setting restrictions on the amount of product that can be dispensed per employee. This reduction in waste translates into cost savings that can be used to fund the vending program.

35%

Average savings you can realize when implementing a vending program with ORR Safety

24 hours 365 days

Assures that your employees have full access to all of their critical Personal Protective Equipment around the clock
