

ORR Vending Program

- Turnkey Services
- Easy to Implement
- All Inclusive Rental Pricing
- Simplified Fill Service Charges
- Pay Per-Machine/Per-Month
- Flexible 2 to 5 Year Agreements
- Volume Discounts Available

What is Included?

- | | | |
|----------------|----------------------------------|--------------------------|
| ✓ Installation | ✓ Software | ✓ Cellular Communication |
| ✓ Training | ✓ Monitoring and Alerts | ✓ Maintenance |
| ✓ Support | ✓ Online Reporting | ✓ Warranty |
| | ✓ FREE iPad to Monitor Reporting | |

What is Extra?

- ✓ Shipping machines to your facility
- ✓ Fill service charge per-machine, per-fill (if needed)

How Does It Work?

1. ORR will assist with product needs/suitability evaluation, and machine selection
2. ORR will calculate the minimum deployment necessary to achieve 35% savings based on maximum 2 fills per week
3. If you choose not to refill machines in-house, ORR will source a local Fill Service Concessionaire

How Do You Measure Your Success?

ORR has partnered with IVM, Inc., a well established and respected worldwide developer of vending technology. ORR's vending machines are highly reliable, field proven industrial grade machines that will continuously monitor and report every aspect of the machine condition, inventory and performance.

- ✓ Receive automatic electronic alerts that tell you when machines need attention or when to reorder based on parameters you set
- ✓ Login to a secure web portal to download, view or export reports describing who received what, when, and which cost center the charges belong to or integrate output from each machine directly to your ERP system

Industrial-Grade Machines For Demanding Environments!

Model 5700 Helical Vending Machine

- Helical style dispensing
- Secured and controlled access
- Authorization through: PIN pad, magnetic stripe card, proximately card or barcode (including invisible barcode)
- Restrictions can be enabled to all different levels
- Communication over the internet can only be established by the machine either through the client network or cellular connection
- All communications use industry standard RSA cryptology using 128-bit encryption coupled with AES encryption algorithms
- Equipped with an electronic beam that monitors whether an item was successfully dispensed
- Tracks dispensing 24/7
- Web portal offers up-to-minute reports based on item, machine, employee, date and much more

Locker Configurations

- Comes in 12, 8, 4 or 3 door configurations
- Controlled by attached vending machine
- Secured and controlled access
- Check-in and check-out capabilities
- Restrictions can be enabled to all different levels
- After the item has been retrieved, the door is locked out from opening until the item has been replenished and the door is reset to indicate the item is available
- A message is sent electronically to the web portal where you can access the vend usage information

Reclamation Lockers

Developed to collect used or soiled products in a controlled and efficient manner. Applications include recycling, laundering, repair, etc. Example: gloves or sleeves.

- Items returned through the Reclamation Locker are tracked and recorded in the same online reporting system that other IVM supply vending systems use
- Industrial strength locker that comes in a three door configuration
- Doors are only opened through authentication at the attached vending machine
- Employee information is entered at the attached vending machine to give authorization to use both the vending machine and locker
- The top two lockers are designated as return bins for incoming items
- Items drop through a chute into the bottom compartment and are deposited into a box for easy removal by the party responsible for collection

Kiosk

Developed to complement existing vending machine and locker system to track and report PPE usage.

- Collects data from locations where a traditional vending machine or locker system may not be efficient
- Used to monitor warehouse or tool crib locations
- Tracks product the same way as the vending machine
- Can apply same restrictions as vending machine
- IBM AnyPlace Desktop with touch screen capabilities
- All-in-one unit is ideal for desktop or countertop use where floor space is limited
- Anyplace Desktop is ADA/508 compliant and is incredibly rugged and tough for industrial environments
